### Pump up in a flash

First there was the electric air-bed pump. Then came the battery-operated air-bed pump. Now, from **Aero Products**, which pioneered quick-inflate air beds and pumps, comes the **Air Light Air Flashlight Pump**, so you no longer have to set

up camp or pump up your air mattress in the dark.

Built into the front handle of the pump are three bright LED bulbs that turn on and off with the push of a button. The pump and lights are powered by 8 C batteries (not included), or your car's cigarette lighter, using the included adapter. The device comes with three adapters to inflate a variety of products.

The Air Light Air Flashlight Pump is \$29.99. Info at [www.thinkaero.com](http://www.thinkaero.com); 1-888-462-4468.
